

CSIdentity searches more than 350 million unique identity records for criminal histories.

CSIdentity School Security Solutions

Your students, their families and your faculty and staff all look to you to ensure their safety on campus and the confidentiality of their personal information. With CSIdentity, you can more easily fulfill this responsibility using the most advanced background screening and fraud detection services available.

Get fast results and accurate reporting for more informed hiring decisions.

With CSIdentity SAFESM (Security Authentication For Employees) you get comprehensive, real-time national and federal criminal background checks to help keep your campuses secure from criminals and sex offenders. Featuring a pre-screening online application and detailed background check system beyond ordinary fingerprinting methods, CSIdentity SAFESM exceeds similar products in its approach to verifying data and authenticating prospective employees' identities.

Our advanced, pre-screening online application allows you to quickly and seamlessly conduct in-depth screening searches, including drug screening and education and employment verification.

Once the hire has been made, CSIdentity SAFESM continues to monitor the employee's criminal records and alerts you to any crimes the employee commits while working for you.

CSIdentity SAFESM includes:

Identity Verification: Is this a real identity? Once the applicant provides their personal information, CSIdentity SAFESM matches it with information from numerous databases to determine if the identity is valid and real.

Identity Authentication: Are applicants who they claim to be? This process requires the applicant to answer questions that are relevant to the identity information provided that go beyond basic name, address and Social Security number information. In doing so, this verifies that the identity does belong to the applicant.

Alternate Names/Aliases: Under what other names is the applicant known? CSIdentity SAFESM searches for name variations including spelling, maiden names, legal name changes or stolen identity names associated with the applicant's Social Security number.

Criminal Records: The criminal records search includes criminal and sex offender records from all 50 states as well as the District of Columbia, Puerto Rico and Guam, with information acquired from the states, territories, administrative office of the courts, Department of Public Safety, Department of Corrections, Bureau of Investigations and local county law enforcement.

Criminal Records Monitoring and Records Management: CSIdentity SAFESM provides monthly monitoring of all criminal records for new hires and existing employees. Any new or recently posted criminal activity is promptly noted via e-mail alerts to the appropriate human resources administrator. All records are encrypted, stored and managed in the CSIdentity SAFESM Records Management System.

CSIdentity SAFESM is a one-stop source for administrators to perform background checks, schedule screenings and review results from a secure, paperless Web application that can be integrated into your existing applicant and employee tracking system.

CSIdentity ProtectorSM – For the personal security of your students and staff.

Now you can offer your students and families, as well as your own employees, the important advantage of personal identity theft protection with CSIdentity ProtectorSM.

This unique product includes detection services to continually monitor:

- Credit Reports**
- Criminal Records**
- Public Records**
- Non-Credit Loans**
- Internet Criminal Sites**
- Sex Offender Reports**

Defense features offer:

ID Theft Insurance: \$25,000 insurance policy underwritten by AIG, with no deductible.

Restoration Services: Access to highly trained Identity Theft Restoration specialists who facilitate identity restoration while providing full support and prompt response during the entire process. A CSIdentity Identity Theft Restoration Agent will do the work on behalf of the subscriber, so he or she can get on with his or her life.

Deterrent features work to educate your students, families and teachers about the risk of identity theft with e-mail and other communications to inform them about the latest trends and scams and other personal protection strategies.

State and federal regulations dictate how schools and employees use and protect sensitive identity data and how to report when that data has been breached. Help protect your organization and be compliant with the latest consumer data protection legislation, including the Fair and Accurate Credit Transactions Act and the Gramm-Leach-Bliley Act by implementing CSIdentity's solutions.

It's all part of a fully coordinated effort that you can undertake to improve safety and security measures at school and away. Contact our representatives today at **1.877.274.7440** for more details about customizing our identity theft solutions for your needs or e-mail us at SAFE@CSIdentity.com for additional information. On or off campus, CSIdentity can help protect you and your school community.

The leading provider of superior identity theft technology, CSIdentity is trusted by departments of the U.S. government, Fortune 500 companies and leading banks and credit unions.
