

# SEX OFFENDER MONITORING AND RADIUS SEARCH

CSID's Sex Offender Monitoring provides alerts and reports that enable a subscriber to discover and monitor registered sex offenders living in the immediate area, and be notified if a sex offender fraudulently registers in a subscriber's name. Our Sex Offender Radius Search returns a list of registered sex offenders within a selected radius of the subscriber's address, one to five miles away.

CSID's Sex Offender Monitoring and Radius Search includes state and national level registries within the U.S.

## Benefits

- Subscribers know where sex offenders live to make more informed decisions regarding where to move, send children to school, and allow the family to spend time
- Subscribers gain more control over the health and safety of their family when it comes to sex offenders
- Ensure that a sex offender does not steal a subscriber's identity to register and fraudulently use their name

**1M+**

**Average number of sex offender alerts CSID sends per month**

## One-Time Sex Offender Radius Search

CSID also offers a one-time Sex Offender Radius Search report that enables clients to offer a one-time report by submitting a specific user's address or latitude and longitude coordinates to populate a real-time search of sex offenders within a user's given area. This also allows users to conduct a real-time search using their current location via smart phone. The report can be offered to existing subscribers as an additional benefit to the Sex Offender Monitoring service or to promote the service to potential subscribers without requiring the user to be subscribed to an identity protection service.
